

Presentations

- **Individualized Study Participant Reports**

How to create individual reports for study participants at 3 time points

- **Quick and Dirty Doesn't Have to be Big and Ugly**

A relatively simple, macro-based approach to describing the variables in a dataset

- **Proc Template**

An introduction on how to customize the appearance of tables and graphs.

- **Simple Descriptive Statistics**

Creating tables to display the descriptive statistics of a dataset.

- **Using the PRNTINIT Macro For Publication Ready Output**

This will be a simple overview of what the PRNTINIT macro can produce and how it works.

Pretty SAS[®] Output: Is it possible?!?

Are you tired of spending hours trying to make your SAS[®] output look professional? The University of Iowa SAS[®] Users Group invites you to attend an instructional seminar on tips and tricks for making SAS[®] output look presentable.

April 24th, 2014
12-1PM

College of Public Health Building
Room N110
