University of Iowa SAS® Users Group
invites you to attend an
Informational Seminar on SAS® Graphics
with Sanjay Matange

Featured Presentations

Quick Results with ODS Graphics Designer

You just received study results and want to get some quick graphical views of the data before you begin the analysis. Do you need a crash course in SG procedures just to get a simple histogram?

The ODS Graphics Designer is the answer. You can render your graphs in batch with new data, and output the results to any open ODS destination.

Tips and Tricks for SG Procedures and GTL for Clinical Graphs

Did you know you could use a vector plot to create an adverse event graph? Or, use a scatter plot to label dosage levels for a medications plot?

SG procedures and GTL provide you myriad ways to mix and match statements to create graphs. What you can achieve is limited only by the creative usage of the statements.

Sanjay Matange, Senior Development Manager in the Data Visualization Division, will give two presentations.

Thursday, Oct. 3
11:30a.m. – 2:00p.m.

Refreshments will be served between presentations

No registration is required

University of Iowa
College of Public Health
Room N110
105 River Street
Iowa City, IA 52242

There will be a drawing for door prizes following each presentation including a book written by the speaker. You must be present to win.
